

TEMPLATE — replace every bracketed [field] with your customer's actual data before sharing externally. The ROI table below uses an illustrative example only; swap in the customer's real numbers.

COMPANY

[Customer Name]

INDUSTRY

[Industry / Trade]

CREW SIZE

[# Workers]

FIELDCREC CUSTOMER SINCE

[Month, Year]

THE CHALLENGE

[1–2 sentences describing the compliance problem this customer faced before FieldCred — e.g. manual spreadsheet tracking, gate delays, time-consuming audit prep, missed expirations.]

THE SOLUTION

[1–2 sentences on how the customer rolled out FieldCred — number of workers onboarded, credential types tracked, timeline from signup to first gate scan.]

THE RESULTS

[X]%

reduction in gate verification time

[X] hrs

saved per week on manual
credential admin

[X]%

faster audit prep, records to CSV
export

[X]

credentials tracked across [X]
workers

"[Insert a direct quote from your customer describing the before/after impact of using FieldCred — what changed for their team, day to day.]"

— [Name], [Title], [Customer Company]

ROI SNAPSHOT

ILLUSTRATIVE EXAMPLE ONLY — figures below are not from a real customer. Replace with your customer's actual numbers.

BEFORE FIELDCREC		AFTER FIELDCREC	
Hours/week on manual credential checks	6 hrs	Hours/week on credential checks	0.5 hrs
Admin cost per year (@ \$28/hr, 50 wks)	\$8,400	Admin cost per year	\$700
Gate delay incidents per month	~9	Gate delay incidents per month	~1
Time to pull a clean audit export	2–3 days	Time to pull a clean audit export	Minutes

Estimated annual savings on manual credential admin alone
(illustrative example — see formula below)

\$7,700/yr

Formula shown: hours/week saved × hourly admin rate × work weeks/year = labor savings only. For net ROI, also subtract the customer's annual FieldCred subscription cost, and consider harder-to-quantify value such as avoided audit penalties or fewer gate delays. Recalculate every figure with the customer's real hourly rate, crew size, and plan cost.
