THE SOLUTION

Operational certainty at every checkpoint.

Before dispatch, at the gate, and during audits — one system that answers whether a worker is cleared.

Prevent gate delays

Scan a QR code and verify credential status in seconds — without calling the office.

Catch expirations early

See valid, expiring, expired, and missing credentials at a glance — renew before they lapse.

Support audit readiness

Records, certificate files, and exports live in one place — ready when an audit calls.

WHO IT'S FOR

Contracting & trades companies · Staffing agencies · Safety & compliance managers · Supervisors & gate security

FieldCred

VERIFY. COMPLY. GET TO WORK.

Know who's cleared before they clock in.

The compliance system of record for workforce credentials — QR verification at the gate, expiration tracking, and audit-ready reporting.

COMPLIANCE SYSTEM OF RECORD

THE PROBLEM

One expired card can hold up the whole crew.

Field and trades work runs on certifications — OSHA cards, journeyman licenses, confined space training, arc flash safety. They expire constantly, and one lapsed credential at the wrong moment means delays and audit exposure.

The gate doesn't wait

A worker shows up on site and someone needs proof of a current cert right now — not after a callback.

Spreadsheets miss expirations

A cert that lapsed last month doesn't announce itself. It just sits there, quietly out of compliance.

Audits become a scramble

When records live in different places, pulling a clean audit trail costs days.

SECURITY

Private by default

Each client gets a fully separate database. Public QR pages never expose contact details.

HOW IT WORKS

Upload once. Verify anywhere.

A simple three-step workflow — no app for the worker to install, nothing for the gate to configure.

1

Upload credentials

Add a worker and their certs — issuer, dates, verification links, badge images, and the certificate PDF. Minutes, not paperwork.

2

Generate a QR badge

Every worker gets a shareable public link and QR code. Nothing to install, nothing for the worker to manage.

3

Verify at the gate

Anyone with a phone camera scans and sees current status in seconds — no login, no app, no call back to the office.

FAQ

Can gate supervisors verify without a login?

Yes — the public verification page opens from any phone camera, no login or app required.

Can we export audit records?

Every plan includes CSV export with certificate files attached to each record.

THE PLATFORM

Everything your compliance team needs.

- ✓ **Workforce directory** — search and filter the entire crew by name, skill, or certification.
- ✓ **Worker profiles** — full certification history, color-coded valid, expiring, or expired.
- ✓ **Instant QR verification** — public link shows status only; contact info stays private.
- ✓ **Admin compliance dashboard** — company-wide view, sortable and exportable, always current.
- ✓ **Bulk import & custom credential types** — built for multi-crew, multi-site operations.
- ✓ **Audit-ready exports** — certificate files attached to every record, exportable by site or type.

PRICING

\$249_{/mo}

Essential — up to 75 workers. Professional and Enterprise plans available.

Launch offer: \$299/mo for up to 100 workers — unlimited credentials & CSV export.
